## QUALITY OBJECTIVE

- (I) To reduce the incidence and severity of spinal injury trauma in our community, through public awareness campaigns, injury prevention programs, and advocacy efforts.
- (II) To provide timely, accurate, and comprehensive assessment and management of spinal injury trauma patients, in accordance with the latest guidelines and best practices.
- (III) To optimize the functional recovery and quality of life of spinal injury trauma patients, through individualized and multidisciplinary rehabilitation programs, patient and family education, and psychosocial support.
- (IV) To conduct high-quality research on spinal injury trauma, and translate the findings into improved clinical practice, education, and policy.
- (V) To foster a culture of quality and safety, by implementing quality assurance and improvement processes, monitoring and evaluating key performance indicators, and addressing any gaps or issues promptly and effectively.
- (VI) To enhance the skills and knowledge of our staff, by providing regular training, mentoring, and professional development opportunities.
- (VII) To collaborate with other stakeholders, such as other health care providers, academic institutions, professional associations, and patient advocacy groups, to share best practices, resources, and experiences.
